ATLANTIS

THE NEW BENCHMARK FOR
OPERATIONAL EFFICIENCY
AND FLEXIBILITY

AVAILABLE UNDER THREE
DIFFERENT CONFIGURATIONS:
EASY, EVO AND EVO XL
DEPENDING UPON CHAMBER SIZE,
REQUESTED APPLICATIONS
AND OPTIONS SELECTION.

ATLANTIS

Greater efficiency

Compared to our previous generation washers, Atlantis offers:

- 10% increased loading capacity (up to 130 mice cages/cycle)
- 50% increased total water impact force (pressure and water flow at nozzle level) for effective cleaning
- 10% to 20% less footprint required, including technical space

Greater flexibility and modularity

- The modular design typical of our Lean Manufacturing makes Atlantis suitable for future functionality upgrades (e.g. hydrogen peroxide decontamination capabilities)
- Building friendly design with unique features to simplify infrastructural requirements
- In-line self-cleaning filters to get rid of historical high maintenance static chamber floor screens
- Double emergency bars with self-releasing doors: safety is not an option!

Greater performance and sustainability

- Less utility requirements: only cold water supply in steam heated units
- About 50l (13gal) of water consumption per a microbiologically-validated cycle with only 100ml (3,4oz) of detergent usage
- Fully certified and compliant with the latest guidelines (AK KAB and AAALAC requirements)

User-friendly
interface
featuring
remote connectivity
for monitoring
and controlling

ATLANTIS EVO XL

- 20 minutes primate racks washing cycle
- Double washing tank standard design for alkaline and acid phases
- Increased chamber size for accommodating large animal cages and racks
- Wide coverage oscillating arms technology featuring additional vertical manifolds for excellent washing results even with odd shapes loads
- H₂O₂ decontamination with external generator, AWS flushing and steam thermal disinfection
