

Rabbit maintenance

fortified (non-sterilized / autoclavable / irradiated)

Complete feed for rabbits

ssniff

Description

This diet has been designed for maintenance of rabbits. The diet is characterized by a higher crude fiber content resulting in a lower energy density. The crude fiber content will support the chewing activity and the physiological gut function.

*The diet (together with hay products) is intended for ad libitum feeding.
The animals should have free access to fresh water.*

Gross Energy (GE)

Complete feed for rabbits

This diet has been designed for maintenance of rabbits. The diet is characterized by very high fiber / low energy contents to prevent obesity in the long-term maintenance. The crude fiber content will support the chewing activity and the physiological gut function.

*The diet (together with hay products) is intended for ad libitum feeding.
The animals should have free access to fresh water.*
